Enzyme Assay Services

Creative Enzymes provides high-quality services for many types of enzyme assays, which are designed and performed by our team of experts. Our service package can also be the solution for your entire research project.

Highlighted Services

Activity measurement
- Kinases, phosphatases, proteinases, decarboxylases, peptidases, esterases, and other enzymes
- Kit assays and customized assays
- High-throughput screening

Development of analysis methods
- Develop assays for newly discovered enzymes or unknown conditions
- Perform challenging assays such as reversible reactions and coupled tests
- Determine parameters for every enzyme such as $V_{max}$, $K_{m}$, $K_a$, $K_b$, and $k_1$ and $k_{-1}$

Enzyme kinetics
- Develop assays for newly discovered enzymes or unknown conditions
- Perform challenging assays such as reversible reactions and coupled tests
- Determine parameters for every enzyme such as $V_{max}$, $K_{m}$, $K_a$, $K_b$, and $k_1$ and $k_{-1}$

Enzyme catalytic mechanisms
- Multiple technologies including crystallography (structural biology), site-directed mutagenesis, reporter group labeling of the substrate or inhibitor, and kinetic measurement with the isotope effect are available.

Workflow

Advantages
- Specialized expertise and resources
- Specialized analysis
- Full range assay equipment and platforms
- High throughput with at least 200 candidates per assay
- Sensitive miniaturized assays
- Rapid and accurate results
- One-stop solution
